

# Cart Dumpers

## Description

Cart dumpers or tippers offer convenience for loading compactors utilizing various compatible carts or containers. They can be configured for ground level, dock level, or piggy back on the compactor. Dumpers are recommended for customers that generate trash from several collection points or produce heavy by-products such as hospitals, RV parks, manufacturing plants, and apartment complexes.

Both stationary and self-contained compactors can utilize cart dumpers. These dumpers are made specifically to fit different size carts ranging from 90 gallon tilt carts to large 4-cubic yard trainable containers.
